Darlington	31.1	73.8		32.1	137.0	46

Source: SC BRFSS, DHEC, County Specific data. The South Carolina Behavioral Risk Factor Surveillance System (BRFSS) is a cross-sectional telephone survey conducted by the Department of Health and Environmental Control (DHEC) with technical and methodologic assistance provided by CDC. This monthly telephone surveillance uses a standardized questionnaire to determine the distribution of risk behaviors and health practices among adults. Responses are forwarded to CDC, where the monthly data are aggregated for each state, returned with standard tabulations, and published at the year's end by each state. For more information visit http://www.cdc.gov/brfss/pages. Since BRFSS was designed to collect state-level data, any generated county level information is subject to variability over time. Thus, caution should be used in interpreting any county-level estimates.
